A (EN)

Time Limit: 1s

Memory Limit: 256MB

Description

Write a program to reverse a string S

Input Format

A single line contains a string S

Output Format

The reversed string S

Constraints

$1 \leq |S| \leq 100$

$'a' \leq S_i \leq 'z'$

Example

Input
abc
Output
cba

Explanation

"abc" will become "cba" when reversed. So the answer will be "cba"
